Kappa

Abstract

The 'Mouse (*Mus musculus*) Immunoglobulin Kappa Variable (IGKV) Genes and Joining (IGKJ) Segments', third report of the 'IMGT Locus on Focus' section, comprises four tables entitled: (1) 'Mouse (*Mus musculus*) germline IGKV gene table'; (2) 'Correspondence between Mouse (*Mus musculus*) IMGT IGKV subgroups and previous designations'; (3) 'Mouse (*Mus musculus*) germline IGKJ table', and (4) 'Mouse (*Mus musculus*) IGKJ allele table'. These tables are available at the IMGT Marie-Paule page from **IMGT**, the international ImMunoGeneTics database (<http://imgt.cnusc.fr:8104>) created by Marie-Paule Lefranc, CNRS, Université Montpellier II, Montpellier, France.

Introduction

'The Mouse (*Mus musculus*) Immunoglobulin Kappa Variable (IGKV) Genes and Joining (IGKJ) Segments' is the third report of the 'IMGT Locus on Focus' section launched in the April 1998 issue of *Experimental and Clinical Immunogenetics* [1], with the first report on the human IGLV genes and IGLJ segments [2] and the second report on human IGKV genes and IGKJ segments [3]. This third report comprises four tables entitled: (1) 'Mouse (*Mus musculus*) germline IGKV gene table'; (2) 'Correspondence between Mouse (*Mus musculus*) IMGT IGKV subgroups and previous designations'; (3) 'Mouse

(*Mus musculus*) germline IGKJ table', and (4) 'Mouse (*Mus musculus*) IGKJ allele table'. These tables are available at the IMGT Marie-Paule page from **IMGT**, the international ImMunoGeneTics database (<http://imgt.cnusc.fr:8104>) created by Marie-Paule Lefranc, CNRS, Université Montpellier II, France [4, 5]. Description of functionality (FUNCTIONAL, ORF, PSEUDOGENE) and description of mutations [1] are according to the IMGT scientific chart available at the IMGT Marie-Paule page. Nucleotide and amino acid numbering of the FR-IMGT and CDR-IMGT (table 1, notes) is according to the IMGT unique numbering [1, 6].

Table 1

Mouse (*Mus musculus*) germline IGKV gene table

Fct : FUNCTIONALITY
 F : Functional
 P : Pseudogene
 ORF : Open Reading Frame
 R : Rearranged
 T : Transcribed
 Pr : Translated into protein

Functionality is shown between:

- **brackets** when the accession number refers to DNA genomic sequence, but not known as being germline or rearranged
- **parentheses** when the accession number refers to a rearranged sequence and the corresponding germline gene has not yet been isolated.

Mouse (*Mus musculus*) IGKV genes, which have not yet been mapped, are designated by a number for the subgroup, followed by the letter S and a number. The IGKV1/OR-1 and IGKV1/OR-2 orphon genes have been proposed to be localised on chromosomes 16 and 19, respectively [Schupp, I. et al, Immunogenetics 45,180-187 (1997)][27].

IGKV subgroup	IGKV gene name	Fct	R	T	Pr	Reference sequences	Accession numbers	Sequences from the literature

17							

Rearranged cDNA or genomic sequences.

p DNA genomic sequence, but not known as being germline or rearranged.

IMGT notes

- (1) DELETION of 16 bp at position 59/60 including the INIT-CODON in the L-PART1, DELETION of 2 bp at position 518/519 in the FR1-IMGT and DELETION of 1 bp at position 743/744 in the FR3-IMGT leading to frameshifts in the V-REGION.
- (2) INSERTION of 1 bp (position 645) in CDR1-IMGT and DELETION of 1 bp at position 796/797 in FR3-IMGT leading to frameshifts.
- (3) DELETION of 5 bp at position 21/22 in the FR1-IMGT leading to a frameshift and mutations in the V-REGION.
- (4) INSERTION of 1 bp (position 879) in FR3-IMGT leading to a frameshift.
- (5) INSERTION of 1 bp (position 828) in FR3-IMGT leading to a frameshift.
- (6) STOP-CODONS in FR2-IMGT and INSERTION of 1 bp (position 780) in FR3-IMGT.
- (7) INSERTION of 570 bp (positions 706-1271) in CDR3-IMGT.
- (8) STOP-CODON (positions 332-334) in FR1-IMGT.
- (9) INSERTION of 570 bp (position 713-1278) in CDR3-IMGT.
- (10) Partial V-GENE in 5' side: partial L-PART1.
- (11) Partial V-GENE in 5' side: no L-PART1, partial L-PART2 and no V-NONAMER.
- (12) Partial V-GENE in 5' side: no L-PART1, L-PART2, and no V-HEPTAMER, V-NONAMER.
- (13) STOP-CODON in FR2-IMGT, INSERTIONS in FR3-IMGT and DELETION in CDR3-IMGT leading to frameshifts.
- (14) Partial V-GENE : no L-PART1 and L-PART2, and partial CDR3-IMGT.
- (15) Non canonical V-HEPTAMER: CACAGAG instead of CACAGTG.
- (16) CONSERVED-Trip is replaced by a Leu in FR2-IMGT.
- (17) Partial V-GENE : no V-HEPTAMER and V-NONAMER.
- (18) Partial V-GENE in 5' side: no L-PART1 and partial L-PART2.
- (19) Defective DONOR_SPLICE: NGC instead of NGT.
- (20) Partial V-GENE in 3' side: no V-NONAMER.
- (21) Partial V-GENE in 5' and 3' side: partial L-PART1 and partial FR3-IMGT.
- (22) Partial V-REGION: partial FR3-IMGT and no CDR3-IMGT.
- (23) INSERTION of 2 bp (positions 344-345) leading to a frameshift in FR3-IMGT and defective ACCEPTOR-SPLICE: NTANNI instead of NAGNN.
- (24) DELETION of the ACCEPTOR-SPLICE, DELETION of 12 bp in the FR1-IMGT, DELETION of 1 bp and INSERTION of 1 bp in the CDR3-IMGT.
- (25) INSERTION of 4 bp (positions 181-184) leading to a frameshift in FR2-IMGT.
- (26) DELETION of 1 bp at position 601/602 in the FR1-IMGT and DELETION of 3 bp at position 604/605 in the CDR1-IMGT leading to frameshifts.
